

Sweetness & Light

On Location

When we shoot on location, we can go several places.

One being your home. The other - the local parks, beaches, or other areas with interesting architecture.

We will always discuss the exact location at the time of booking and we will exchange cell phones to make sure we can always connect. You are welcome to change clothing on location, however; it can be tricky at public spaces!

When going on location, we will suggest areas that are a favorite, or if you have somewhere special in mind, we will be happy to accommodate you. Photography is a go in all weather, except steady rain or snow. Ironically, overcast skies are preferred! In cooler times of the year, please wear jackets that can be removed and put back on with ease.

When Sandra is going to your home, she will pack lighting just in case we need it; however her first instinct will be to shoot using all available light. If we are going to your home, upon entry, we will take a tour through the house and discuss best places to photograph.

Pets are always welcome - in studio or on location. Just let us know.

Location sessions do take longer than studio sessions. There are never time limits, and we will do our best to always capture your family in the best light possible!
